Iterative Control instruction

Part-1

Saurabh Shukla (MySirG)

Agenda

- ① Iterative control statements
- ② while loop
- ③ Practice problems

Iterative Control Statements (loop)

- ① while
- ② do while
- ③ for

```
main()  
{
```

```
    while ( )
```

```
    {
```

```
    }
```

```
    }  
}
```

while

Write a program to print MySirG
5 times on the screen.

```
int main()  
{  
    int i=1;
```

```
    while(i6 <= 5)  
    {
```

```
        printf("MySirG");  
        i++;
```

```
    }
```

```
}
```

Write a program to print first 10 natural numbers.

1 2 3 4 5 6 7 8 9 10

```
int main()
```

```
{
```

```
    int i=1;
```

← initialize

```
    while ( i <= 10 )
```

← condition

```
    {
```

```
        printf("%d ", i);
```

```
        i++;
```

← flow

```
    }
```

```
}
```

Write a program to print first
N natural numbers.

N=5 | N=8 | N=3
1 2 3 4 5 | 1 2 3 4 5 6 7 8 | 1 2 3

① Read

② Test case

③ Dry Run

```
int i = 1, N;
```

```
printf("Enter a number");
```

```
scanf("%d", &N);
```

```
while (i <= N)
```

```
{
```

```
    printf("%d", i);
```

```
    i++;
```

```
}
```

N=5
N=8
N=3

i <= 5
i <= 8
i <= 3

Find Output of the program

```
int main()
{
```

```
    int i = 0;
```

```
    while (i <= 6)
    {
```

```
        if (i % 2)
```

```
            i = i - 3;
```

```
        else
```

```
            i = i + 5;
```

```
        printf("%d ", i);
```

```
    }
```

```
    printf("%d", i);
```

```
}
```

0 <= 6 T

5 <= 6 T

2 <= 6 T

7 <= 6 F

5 2 7 7
